DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 28-46, drawn to a method and lithography alignment system, classified in class 356, subclass 401.
 - II. Claims 16-27, drawn to a lithography system, classified in class 355, subclass 53.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II are independent from each other. Invention I claims a method and a system of alignment that does not require the particular lithography system of Invention II. The lithography system of Invention II does not require the particular method or alignment system of Invention I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
